### MEMORANDUM

TO: Vermont Mental Health Performance Indicator Project  
Advisory Group and Interested Parties

FROM: John Pandiani  
Monica Simon

DATE: February 8, 2002

RE: CRT Employment

The attached pages update our monitoring of employment rates for clients of Vermont's CRT programs for adults with severe and persistent mental illness to include the first quarter of FY2002. The methodology used in this project is described in our PIP for October 12, 2001 ([www.state.vt.us/dmh/Data/PIPs/2001/pip101201.pdf](http://www.state.vt.us/dmh/Data/PIPs/2001/pip101201.pdf)). Annual data for FY2000 and FY2001 are provided in our PIP dated December 21, 2001 ([www.state.vt.us/dmh/Data/PIPs/2001/pip122101.pdf](http://www.state.vt.us/dmh/Data/PIPs/2001/pip122101.pdf)). When you compare this report with other reports, please be aware that quarterly employment reports always show lower employment rates and less income because a shorter period of time is being examined.

As you will see statewide employment rates for CRT clients and average wages for employed CRT clients during the most recent quarter have increased over the past two years. Employment rates for CRT clients increased from 21% during the first quarter of FY2000 to 23% during the first quarter of FY2002. The average earnings of employed CRT clients increased from \$1,782 during the first quarter of FY00 to \$2,185 during the first quarter of FY2002.

We will appreciate your comments on this report format, your interpretation of these data, and your suggestions for further analysis to [jpandiani@ddmhs.state.vt.us](mailto:jpandiani@ddmhs.state.vt.us).

Analysis includes Community Rehabilitation and Treatment clients aged 18 - 64 who were active during any part of the reporting period and includes all employment reported for the reporting period.

This report is based on record linkage of the Department of Developmental and Mental Health Services (DDMHS) and the Department of Employment and Training (DET) databases. DDMHS client data are submitted by Community Rehabilitation and Treatment Programs in conformance with contractual requirements. DET data are submitted by employers in conformance with state and federal unemployment laws. Workers who are excluded from DET reporting are the self-employed, firm owners not incorporated and the following employee groups: elected officials, employees of nonprofit religious, charitable and educational organizations, unpaid family members, farm workers (with some exceptions), and railroad employees.

## CRT Clients Employed By Quarter: July 1999 - September 2001

Quarterly employment rates are lower than annual employment rates because not all clients who are employed during a year are employed during every quarter of the year.

Analysis includes Community Rehabilitation and Treatment clients aged 18 - 64 who were active during each reporting quarter and includes all employment reported for each quarter.
